

We provide every student with the counseling support that helps the student with both the academic and emotional support required for success so they can achieve their full potential.

Our goal is to maximize success for every student by helping remove learning obstacles so they can thrive at Sylvan Prep Academy.

We spend a lot of time with our students. We know them. We work with students and meet with parents at any time so we work as a team to integrate the school's mission to make sure they have the tools to succeed. Sylvan Prep staff provides a supportive environment for students to help them identify appropriate paths in academics, activities, and eventually college placement.

For example, we work with families to help them management their academic calendar and so they can also compete in various sports competitions or combining work intern with study projects locally or in other states or countries. Our counseling services include:

- ✚ Technology support
- ✚ Team support
- ✚ Academic support
- ✚ College prep support
- ✚ Crisis intervention

We recognize that each child is unique, and we strive to help them identify their strengths, values, and interests. We recognize the competitive nature of admissions at many colleges and coach our students on how best to present themselves and how to be prepared.

Our support is individualized and proactive. We empower students to take ownership of the process.
